DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 21, 22, and 36-87, drawn to a mat, classified in class 428, subclass 88.
 - II. Claims 24-32 and 88-100, drawn to a moulding sheet for making mats, classified in class 428, subclass 82, 156, and/or 192.
 - III. Claims 34 and 35, drawn to a process for making a mat, classified in class 264, subclass 314.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of Group III and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product can be made by creating pressure via a vacuum rather than an inflated bag.
3. Inventions of Group II and Group I are related as apparatus and product made. The inventions in this relationship are distinct if either or both of the following can be shown: (1) that the apparatus as claimed is not an obvious apparatus for making the product and the apparatus can be used for making a different product or (2) that the product as claimed can be made by another and materially different apparatus (MPEP § 806.05(g)). In this case, the product could be made by laminating a pre-made rubber backing have the claimed periphery to a fabric layer.

Art Unit: 1771

4. Inventions of Group II and Group III are related as process and apparatus for its practice.

The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus can be used to mold a rubber sheet without a textile layer or with layers of other materials.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. A telephone call was made to James McKee on September 23, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
